Solutions Guide

Helping the world get the most from digital assets

Information – an essential business asset

Digital information has changed our world, transforming business as we know it. Information has moved to the center of almost every organization. Companies large and small rely on their digital assets like never before to thrive and even survive.

Make the most of your digital assets

Getting the most value out of digital content is paramount to success in an accelerating, competitive world. Effectively managing, protecting and distributing data is a critical factor to success. Yet even as we enter the Internet Age, moving and storing data is not as easy as just putting it on the Web. Real-world digital logistics require innovative solutions for archiving and distributing data.

About Rimage

Rimage Corporation is the world's leading provider of workflow-integrated digital publishing solutions that produce CD/DVD/Blu-ray Discs™ with customized content and durable color or monochrome labels. Rimage helps companies in a broad range of markets get the most from their digital assets.

Serving you around the world

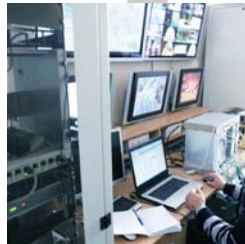

Rimage is a global business with offices in the U.S., Germany and Japan - and a global partner network. Rimage has a solution and a local area representative to serve your digital asset needs.

“We turned our disc publishing investment into a profit center within just three months.”
IT Director, Government Service Bureau

- Healthcare
- Technical Documents
- Photo & Image Distribution
- Enterprise Content Management
- Security
- Government

Solutions

Every business is unique, and each challenge is different. Rimage systems are adaptable to a broad range of information workflows in a variety of industries. Our solutions help lower costs, increase productivity and streamline business processes.

Surveillance

Rimage Surveillance Solutions integrate seamlessly with industry leading surveillance products to reduce costs and complexity in ever-growing surveillance video installations. Rimage Surveillance Archiver offloads inactive content to DVD or Blu-ray Discs, enabling more cameras and longer retention times. Rimage Surveillance Publisher automates the distribution of surveillance events with a secure, professional and indelible export disc.

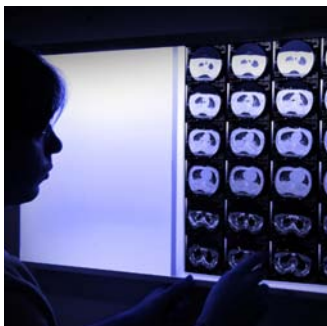

- Extend retention time
- Find incidents and export securely
- Lower cost per TB

Digital Forensics

The Rimage Evidence Disc System (EDS) is changing the way CD/DVD/Blu-ray Disc evidence is processed by law enforcement organizations. The EDS-Enterprise and the EDS-Pro digital forensics solutions save investigators valuable time by processing hundreds of evidence discs automatically, transforming arduous week-long examination processes into simple overnight operations.

- Automate ingestion and review of evidence
- Preserve validity of evidence
- Save investigators valuable time

Medical Imaging and Records

Rimage medical disc systems exceed the demanding requirements for system reliability, integration, data longevity and print stability in healthcare. When medical images need to be stored or distributed, Rimage systems replace expensive film with low cost optical media, automating and securing the distribution of patient records via CD, DVD and Blu-ray Discs — the media of choice for healthcare organizations.

- Automate patient record export to personalized discs
- Dramatically reduce production costs vs. film
- Integrate seamlessly with leading PACs and modalities

Video Distribution

The entertainment industry relies on Rimage video solutions to deliver a wide variety of content and cut operating costs. Rimage enables on-demand production of movies, videos and music for consumers, reviewers, and members of the production team, creating discs that look and act just like mass-produced media. Rimage video solutions integrate seamlessly within standard production workflows and copy protection technologies.

- Reduce costs for high quality, low volume production
- Produce a large library of titles on-demand
- Integrate with watermarking copy protection solutions

Content Archiving

Rimage disc publishing systems play a vital role in archiving data when long-term, cost-effective and secure solutions are required. Blu-ray Discs cost less per TB per year than RAID systems, including the costs of power, migration and management. Rimage has an industry-leading system and workflow for archiving office documents, software source code, digital video, medical images and many other types of data.

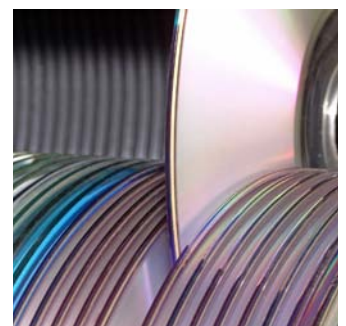

- Store content safely for decades
- Faster recall compared to tape solutions
- Lower archiving costs compared to hard disk drives

Content Distribution

Financial statements, billing information, content distribution and legal evidence are just a few examples of the different kinds of data that must be shared between parties. Whether ten or one thousand discs are needed per day, Rimage content distribution solutions deliver personalized content quickly and affordably.

- Distribute thousands of individually personalized discs
- Advanced programming interfaces reliably integrate with your workflow
- Secure distribution of sensitive information

Producer™ Series

These powerful, industrial-grade solutions are designed for round-the-clock operation. Rimage Producer systems execute complex customer applications in the world's most demanding production environments.

Industrial grade robotics, innovative printing technology and professional recording technologies are integrated within a publishing system unequalled for performance, versatility and reliability.

Producer 8100N

Recorders	4 CD/DVD or Blu-ray Disc
Printers	Everest 600 or PrismPlus!
Disc type	CD, DVD and Blu-ray Disc
Input/Output	Four 100-disc bins + 50-disc output bin
Controller	Embedded
Software	PSS*
Dimensions	H: 72.7 cm W: 41.9 cm D: 62.9 cm
Weight	45.4 kg (without printer)

Producer 7100N

Recorders	2 CD/DVD or Blu-ray Disc
Printers	Everest 600 or PrismPlus!
Disc type	CD, DVD and Blu-ray Disc
Input/Output	Four 100-disc bins
Controller	Embedded
Software	PSS*
Dimensions	H: 64.1 cm W: 41.0 cm D: 62.9 cm
Weight	39.9 kg (without printer)

Producer 6100N

Recorders	1 CD/DVD or Blu-ray Disc
Printers	Everest 600 or PrismPlus!
Disc type	CD, DVD and Blu-ray Disc
Input/Output	Four 100-disc bins + five-disc output bin
Controller	Embedded
Software	PSS*
Dimensions	H: 58.7 cm W: 41.3 cm D: 62.9 cm
Weight	38.1 kg (without printer)

*see page 9 for software options

"The quality of the discs we produce is much better than we could accomplish with a lower-end system and much more efficient than using a third party vendor."
Director, Regional School District

The Rimage Professional Series is a compact, all-in-one solution designed specifically for front office settings. It offers an entry point into on-demand disc publishing, allowing single users or workgroups to create discs as easily as they print to the office printer.

Professional™ Series

Durable enough to publish hundreds of CDs, DVDs, and Blu-ray Discs per day with twice the speed and throughput of competing systems, Rimage Professional systems provide unmatched performance and reliability.

Recorders	2 CD/DVD or Blu-ray Disc
Printers	Everest 400
Disc type	CD, DVD and Blu-ray Disc
Input/Output	Three 50-disc bins + five-disc output bin
Controller	Embedded
Software	PSS*
Dimensions	H: 48.3 cm W: 37.6 cm D: 49.5 cm
Weight	31 kg

Professional 5400N

Recorders	2 CD/DVD or Blu-ray Disc
Printers	Everest 400
Disc type	CD, DVD and Blu-ray Disc
Input/Output	Three 50-disc bins + five-disc output bin
Controller	Embedded
Software	NSS or RSS*
Dimensions	H: 48.3 cm W: 37.6 cm D: 49.5 cm
Weight	29 kg

Professional 3400

Use Rimage Media Kits with the Producer and Professional Series to streamline production and guarantee quality prints – every time.

“Our Rimage purchase was a great decision. Customers love the quality of the Everest-printed discs because it helps them promote their company image. As a service, it’s very marketable.”
 President, Service Bureau

Desktop Series

The Rimage 2000i desktop publishing system is the most efficient desktop CD/DVD publisher today. With proven reliability, quality inkjet printing and optional network connectivity, the 2000i is easy to use and ideal for a small office environment.

The Rimage 2000i™ Inkjet Printer prints affordable CD and DVD discs in a wide range of colors, resulting in vivid graphics and sharp, easy-to-read text.

Open the box, plug it in and turn it on – there's no assembly required, and no printer to mount or align. You can put this low-cost, high-quality desktop CD/DVD publishing solution to work in a matter of minutes.

Advanced software tools for the 2000i combined with unparalleled service and support give you extraordinary ease of use, reliability and industry-leading efficiency.

2000i™

Recorders	2 CD/DVD
Printers	Rimage 480i Inkjet
Disc type	CD and DVD
Input/Output	100 Discs
Controller	Non-embedded
Software	OSS or SDA*
Dimensions	H: 53.3 cm W: 40.0 cm D: 50.8 cm
Weight	28.1 kg

Use Rimage Media Kits with the 2000i to streamline production and guarantee quality prints – every time.

“The Rimage system has allowed us to create the best looking CD in town. Rimage helps us wow the customer.”
 President, Large Photo Center

Rimage software is at the heart of our solutions; driving the performance, productivity and reliability behind our customers' success. Rimage has invested more than a decade in multiple generations of software, delivering more power, features, and flexibility to our products.

QuickDisc/DiscFlow™/WebQD

QuickDisc for PCs, DiscFlow for Macs® and WebQD applications enable job preparation, submission and monitoring. Easily select job type, drag-and-drop disc content, choose your artwork, preview and submit.

CD Designer™

CD Designer for Windows® allows you to easily design custom, professional-looking artwork to be printed directly on the surface of your discs.

Rimage System Manager (WebRSM™)

Rimage System Manager (WebRSM) enables you to fully control and monitor your Rimage systems from anywhere on the network. Monitor the status of your jobs, get accurate disc and media volume status, and control functionality.

Additional Software Capabilities

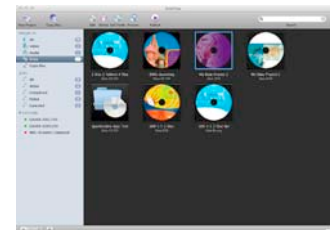

- Rimage Software Development Kit enables seamless integration
- Rimage API and Rapid API enables easy integration into fully automated workflows.
- Rimage Video Protect (RVP) prevents unauthorized duplication of video DVDs
- Rimage Zip Password Protect encrypts CD, DVD and Blu-ray data, photos or videos

“The Rimage software is not only extremely versatile and dependable, but makes it easy for anyone on my team to sit down at a workstation and set up a new job without any problem.”
Project Coordinator, Research Company

Print Technology

Rimage is a pioneer in professional direct-to-disc printing technology. Whatever your application, Rimage printers deliver industry-leading quality, durability and impact.

Everest 600

Everest™ Printers

Rimage Everest thermal retransfer printer technology sets a new standard for quality, delivering the most durable discs and highest print resolution in the industry. Text and artwork are permanently fused to the surface of the disc. No other print technology matches the print resolution, print speed and durability of an Everest printer.

Resolution	600 DPI
Nominal Print Speed	60 seconds in photo and graphics mode
Disc Type	CD, DVD and Blu-ray Disc
Print Modes	CMY, Monochrome Black
Dimensions	H: 24.6 cm W: 24.1 cm D: 37.6 cm
Weight	20.4 kg

PrismPlus!™ Printers

PrismPlus! prints black or monochrome labels to discs at unmatched speeds. Using a single-stage, direct thermal printing process, the PrismPlus! printer can print a disc in as little as five seconds. Rimage PerfectPrint technology lets you personalize pre-screened discs with Prism monochrome printing.

PrismPlus!

Resolution	Up to 300 DPI
Nominal Print Speed	3-5 seconds per disc
Disc Type	CD, DVD and Blu-ray Disc
Dimensions	H: 15.2 cm W: 21.6 cm D: 35.6 cm
Weight	9.07 kg

“Customers notice the superior print quality when compared to inkjet. That’s one of the reasons the equipment has more than paid for itself.”
President, Service Bureau

Rimage AutoPrinters

Rimage Auto Everest and Auto Prism*Plus!* AutoPrinters combine Rimage printers with robotics to automate CD, DVD and Blu-ray Disc printing. Built on the Rimage Producer Series robotic platform, these printers are ideal for use with duplication towers or for pre-printing discs. Rimage AutoPrinters are an affordable and flexible choice for high-volume disc printing.

Prism*Plus!*
AutoPrinter

Everest 600
AutoPrinter

Printers	Everest 600 or Prism <i>Plus!</i>
Disc type	CD, DVD and Blu-ray Disc
Input/Output	Four 100-disc bins
Controller	Non-embedded
Weight	25.9 kg

Rimage Media Kits deliver guaranteed performance with matched, prepackaged quantities of discs and printing ribbons. Rimage systems are designed to work with Media Kits to deliver consistent print quality and guaranteed data integrity.

Everest Media Kits come in 500, 1000 and 10,000* disc quantities and are specifically designed for Everest thermal print coatings. CDs, DVDs and Blu-ray Discs in Media Kits are guaranteed to pick, clamp, record and print to your satisfaction.

Rimage Media Kits

*not available in Europe

“Another impressive thing is that Rimage guarantees the media, so if you have writing problems on a piece of media or it fails to verify, they’ll actually replace that disc.”
Senior Systems Developer, International Software Development Firm

Service & Support

Rimage is the leader in delivering high quality, world-wide service. Rimage's fast response times maximize your system uptime, and its unrivaled high-value maintenance agreements boost your return on investment.

Rimage understands that your business relies on your automated system, and uptime and quick problem resolution is a must. Whatever your support needs are, Rimage has a solution. When you choose Rimage Service & Support, you choose success.

Rimage Maintenance Packages

Rimage maintenance agreements are designed to meet your production requirements and budget - and keep down time to an absolute minimum.
